

Spring Term Letter

What a term this has been... As you are well aware, the children worked so hard during their time at home.

It has been great to have them back in the classroom again and get back to normal.

We have been focusing on Varjak Paw as a whole class text in English. The children seem to have enjoyed what we have covered so far and have produced some great writing based on this. We have been focusing on using prepositional phrases and plenty of detail to make our writing engaging, and have begun using the possessive apostrophe.

In Maths we have been focusing on shape and fractions. Using equipment and practical resources has helped the children's understanding in these areas.

In Geography we have been focusing on maps. We have looked at longitude and latitude lines and why these are important. Also, we have learnt to use four figure grid references along with compass bearings.

In Science we have enjoyed carrying out observations in the school area of the wildlife, plants and trees. We have then been looking at the different ways that we can classify these. Further to this, we have looked at animal habitats and how we affect these.

I hope you have a great Easter and a well-deserved rest.

Mr Parr
